

Ansif P. Ibrahimkutty

Software developer · payroll consultant

Native Kottayam, Kerala · lives in Aluva, Kochi (near Cochin International Airport) · open to remote

ansif.pi@gmail.com · WhatsApp +91 95444 67729 · [linkedin.com/in/ansifpi](https://www.linkedin.com/in/ansifpi) · github.com/ansifi · ansifi.github.io

About me

I'm a hands-on software developer with **20+ years** (2006 – present) across **C++/Qt embedded, full-stack web, mobile, payments, and backend APIs**. I am from **Kottayam**, Kerala, and I live in **Aluva, Kochi**, near **Cochin International Airport**. Since **2016** I've worked at **Sevendyne** as **payroll consultant** and developer — building client software, running India payroll for remote engineering teams, and shipping the in-house business platform (jobs portal, Payrolls HRMS, academy, and CRM tools). Before that: freelance Qt/C++ work and early roles in Malaysia, Saudi Arabia, and India.

Skills

Languages & systems: C · C++ · VC++ · C# / .NET · Python · PHP · Ruby · JavaScript / TypeScript · Java · Solidity · SQL

UI & apps: Qt · QML · Wt · Android · React · Angular · Vue.js · Next.js · Apache eCharts

Web & APIs: Ruby on Rails · Spree Commerce · Redmine · Django · Node.js · Express · Spring Boot · Laravel · CodeIgniter · REST APIs

Data & infra: PostgreSQL · MySQL · SQLite · SQL Server · Redis / queues · Docker · nginx · GCP Cloud Run

Embedded & industrial: embedded Linux · Wayland · IVI/HMI · USB/protocol tooling · PLC/SCADA coordination

AI & integrations: OpenAI APIs · Zoho Recruit APIs · Web3.js · Truffle · Ethereum

Operations: code review · India payroll (PF / ESIC / TDS / GST) · multi-tenant SaaS

Experience

Sevendyne — payroll consultant & software developer

Sep 2016 - present · Kochi, India (remote delivery for UK, Germany, Malaysia, Singapore, UAE) · sevendyne.com — payroll consulting and software development

I co-founded Sevendyne and have stayed on as developer and **payroll consultant** — client delivery during the week, plus payroll and platform work for the teams we support. Everything below was done in that role unless noted.

Public tooling

Redmine Time Export — Redmine plugin to export project spent time to CSV/XLSX, grouped by user (Redmine 6.1.x).

Sevendyne platform apps (Dec 2025 - present)

Building and maintaining the company's own multi-app platform: hiring portal, India Payrolls HRMS, technical academy (topic tests and interview prep), and internal marketing/CRM tooling.

- **Payrolls HRMS** — Django + Next.js; monthly payroll runs, payslips, client invoicing, PF/ESIC/TDS/GST workflows, per-client payroll databases
- **Jobs portal** — employer/candidate workspaces, résumé intake, matched jobs bridge to CRM, interview coordination APIs
- **Technical / academy** — candidate progress API, lesson completion, topic-test scoring, embed auth for dashboard modules
- **Marketing / CRM** — Node APIs, SQLite tenant CRM, lead finder and outreach modules wired to the jobs pipeline
- **Infra** — Docker Compose locally; services on GCP Cloud Run; nginx path routing between web, hr, jobs, technical, and marketing apps

Quantyf — backend developer (contract)

Jun 2025 - Nov 2025 · Remote · quantyf.com — AI-powered supply chain optimization

Worked on the **Python backend** for Quantyf's optimisation product (supply-chain "what-if" modelling). My focus was **REST API design and implementation**, integrating optimisation runs with the product UI, and a structured **code-review process** for the core algorithm modules so changes stayed testable and safe to ship.

- Built and extended backend endpoints for scenario input, run status, and result retrieval
- Reviewed optimisation and data-pipeline PRs — edge cases, performance, and API contracts
- Helped tighten error handling and logging around long-running solver jobs
- Stack: Python · REST APIs · supply-chain optimisation services

CSR Informatics GmbH — remote full-stack developer

May 2022 - Mar 2025 · Germany · via Seventdyne

Long-running remote engagement: analytics, e-commerce data, and recruitment automation.

Zoho Recruit automation (2024 - Mar 2025)

Customised Zoho Recruit beyond out-of-the-box config; added **Python + OpenAI** scripts for candidate search and import. Built idempotent SQL loaders, operator review screens, and workflow gates so recruiters could approve before records went live.

Python · OpenAI API · Zoho REST APIs · SQL Server · scheduled jobs

E-commerce / AI data pipeline (2023 - 2024)

Ruby on Rails app on **Spree Commerce**; Python scrapers with OpenAI extraction for product attributes; ETL into **SQL Server** for catalogue and ops dashboards.

Rails · Spree · Python · OpenAI · SQL Server · background workers

Restaurant analytics dashboard (2022 - 2023)

Angular front end, **Spring Boot** services, heavy **SQL** aggregation for multi-site restaurant KPIs;

Apache eCharts for ops views; Python helpers for ad-hoc data fixes.

Angular · Spring Boot · PostgreSQL/SQL · eCharts · REST

Niaga Prestasi — remote full-stack developer

Sep 2019 - May 2022 · Malaysia · via Seventdyne

TLMS logistics (2019 - 2022)

Malaysia-Singapore freight platform. Re-architected **Laravel** transaction layer with **queue workers** to clear sync deadlocks between mobile field apps and MySQL; **Vue.js** operator UI; REST APIs for web, desktop, and mobile telemetry. Ran thousands of live shipments daily after the rework.

Laravel · Vue.js · MySQL · Redis/queues · REST

PayU / RedDot payment CRM (2019 - 2022)

Multi-tenant **CodeIgniter/PHP** CRM for wallet, merchant, and logistics payment channels; payment adapter layer; **Android** and web QR checkout flows in daily APAC production.

PHP · CodeIgniter · Android · REST · multi-tenant DB design

RedDot Payment CRM (2021 - 2022)

EMI plans, merchant onboarding, modular PHP modules, companion Android app for field staff.

CodeIgniter · PHP · Android · MySQL

Ethereum / tokenised property wallet (2020 - 2021)

React wallet UI; **Solidity** contracts; **Truffle** deploy pipeline; **Web3.js** for multi-network transactions.

React · Solidity · Truffle · Web3.js · Node.js

Earlier Seventdyne client delivery (2016 - 2019)

Trading System Qt desktop (2016 - 2018)

Low-latency **C++/Qt/Wt** trading desks; adapter layer over proprietary market-data libraries; multi-window layouts for operators.

C++ · Qt · Wt

German navigation product (dedicated pod)

Embedded **C++** on Linux for real-time navigation features; worked directly with German product leads.

C++ · embedded Linux

UK automotive / industrial programmes (2019 - 2024)

Software and automation delivery on long OEM programmes (PLC/SCADA bench coordination with UK technical leadership).

C++ · industrial automation tooling

Freelance software developer

Jan 2012 - Aug 2016 · India · remote

Wise Owl (2015 - 2016) — C++/Qt property admin: tenants, brokers, listings.

HCL Technologies (2014 - 2015) — Qt/QML IVI for Panasonic and Cobham; defence HMI on Wayland Linux.

Montal (2013 - 2014) — Qt/QML 2D game UI.

Quality Education Holdings, Saudi Arabia (2012) — .NET/C# fingerprint attendance apps.

Software engineer — HexoSys SDN BHD

Sep 2009 - Sep 2011 · Kuala Lumpur, Malaysia

USB protocol tester: **Qt/VC++** debug console; TCP/UDP validation on embedded hardware.

Earlier development roles

IntegralSoft / UCI Technologies (2006 - 2008) — VC++ USB modelling, trading utilities, CAD tools.

Pramura Technologies (2009) — C++ product work.

Education

SSLC (Class 10) — Kerala

Higher Secondary (HSE / Plus Two) — Kerala

B.E. Computer Science — TKM College of Engineering, Kollam · Kerala University · **2002 - 2006**

Open to

Remote **software developer, backend**, or **full-stack** roles. Happy to talk via email or LinkedIn.
