

Ansif P. Ibrahimkutty

Research Developer & Systems Architect

Email: ansif.pi@gmail.com | Phone: +91 95444 67729 | linkedin.com/in/ansifpi | github.com/ansifi | sevendyne.com

PROFESSIONAL PROFILE

Hands-on research developer and systems architect with 18+ years building production software across trading systems, embedded automotive platforms, fullstack web applications, and AI-integrated data pipelines. Work is delivered independently and through Sevendyne, a research and development consultancy I co-founded in 2016. Track record spans low-latency C++/Qt desktop systems, Ruby on Rails and Laravel platforms, Python/Django and AI-driven backends, and — most recently — architecting and operating a self-owned multi-service cloud platform end to end.

TECHNICAL EXPERTISE

- **Languages & Frameworks:** C++, Qt/QML, Wt, Python, Django, Flask, Ruby on Rails (Spree, Redmine), Laravel, CodeIgniter, Node.js, Spring Boot, Next.js, Vue.js, Angular, React, Android, VC++
- **Data & AI Systems:** OpenAI API integration, automated scraping/ETL pipelines, PostgreSQL, MySQL, Microsoft SQL Server, SQLite
- **Infrastructure & DevOps:** GCP Cloud Run, Docker, Docker Compose, Nginx reverse-proxy gateways, Cloud Build/Kaniko CI-CD, Artifact Registry, multi-tenant database partitioning, Embedded Linux, Sockets, IPC
- **Domain Strengths:** Systems architecture, real-time/low-latency systems, embedded automotive software, fullstack platform design, AI-integrated pipelines

CORE EXPERIENCE & PROJECTS

Research Developer & Systems Architect — Sevendyne App Platform

Sevendyne • Mid 2025 – Present • Kochi, India / Remote

- Architected and built app.sevendyne.com end to end on GCP Cloud Run: an Nginx gateway routing to independently deployed services — a Flask + SQLite/GCS Jobs API, a Next.js 16 + Django HRMS Payroll/HR system with SMTP-driven notifications, and a Vite-based technical academy bundled under `/technical/`.
- Own the full delivery pipeline: Cloud Build and Kaniko into Artifact Registry, service isolation, and infrastructure decisions across all three services.

GCP Cloud Run, Nginx, Flask, SQLite, Next.js, Django, Vite, Cloud Build, Kaniko, Artifact Registry

Systems Developer — Embedded C++ Project

Direct Client Engagement • Late 2024 – Early 2025

- Delivered a C++ systems engineering project, continuing hands-on low-level development alongside platform architecture work.

C++

AI / Fullstack Developer — Angular & Python AI Systems

Direct Client Engagement, incl. CSR Informatics GmbH (Germany), Quantyf (UAE) • May 2022 – Late 2024

- **Data Aggregation & AI Catalogs:** Engineered a Ruby on Rails / Spree Commerce catalogue processor paired with Python automation using OpenAI APIs to extract structured attributes from raw supplier data into SQL Server, for CSR Informatics GmbH.
- **Recruitment Automation & Dashboards:** Scaled transactional scripts against Zoho Recruit REST endpoints with strict verification gates; built multi-site performance portals on Spring Boot, SQL data normalization, and an Angular UI visualizing business health indices via Apache eCharts.
- **Backend Optimization:** Designed and refined Python REST API frameworks for “what-if” supply-chain simulation models for Quantyf, interfacing real-time solver runtimes with front-end user spaces and refactoring core mathematical algorithms.

Ruby on Rails, Spree, Python, OpenAI, SQL Server, Spring Boot, Angular, Apache eCharts, REST APIs

Fullstack Developer — CodeIgniter Platform

Direct Client Engagement • Fintech • 2021 – May 2022

- Built and maintained a PHP/CodeIgniter web platform for a fintech client, including backend logic and front-end integration.

PHP, CodeIgniter

Fullstack Developer — Laravel Platform

Direct Client Engagement • Logistics • Sep 2019 – 2021

- Delivered a fullstack Laravel platform end to end for a logistics client, covering backend architecture and application logic.

Laravel, PHP, MySQL

Research Developer — Code Review Platform

Direct Client Engagement • Software / Engineering Tools • Mid 2018 – Sep 2019

- Developed a C++/Qt based code review tool for an engineering tools client.

C++, Qt

Research Developer — Trading System API

Direct Client Engagement • Fintech Startup • 2016 – 2018

- Built a C++/Qt trading system API handling real-time market data streams for a fintech startup.

C++, Qt, Real-Time Systems

Co-Founder — Sevendyne

Sevendyne Consultancy Services LLP • 2016 – Present • Kochi, India

- Co-founded Sevendyne as the vehicle for the research and development work above; the entity now also provides client staffing and payroll services alongside project delivery.

Independent Systems Architect

Self-Employed • Jan 2012 – Sep 2016 • Kottayam, Kerala, India

- **2015 – 2016:** Engineered a property administration platform (Wise Owl Property Management) using C++ and the Webtoolkit (Wt) framework to service dense tenancy pipelines.
- **2012 – 2014:** Built Montal, a 2D game project, using C++/Qt — covering game state architecture and dynamic, resource-optimized UI scaling components.

C++, Qt, Wt

Software Engineer — Automotive HMI & IVI

HCL • 2014 – 2015 • Kochi, India

- Developed C++/Qt based HMI and IVI (In-Vehicle Infotainment) systems for automotive platforms.

C++, Qt, HMI, IVI, Automotive

Software Engineer

HexoSys Group • Sep 2009 – Sep 2011 • Kuala Lumpur, Malaysia

- Engineered a low-level USB protocol analyzer debugging console using VC++ and Qt, capturing real-time TCP/UDP traffic off embedded hardware.

VC++, Qt, Sockets, Embedded Hardware

Trainee Software Engineer

Integral & UCI Tech • Apr 2007 – Apr 2009 • Kochi, India

- Began professional software career writing VC++ systems automation tools, custom CAD geometric format parsers, and low-level USB peripheral modeling applications (Pathmodeler).

VC++, CAD Parsers, Embedded Tools

EDUCATION

B.Tech in Computer Science & Engineering

TKM College of Engineering, Kerala University • 2002 – 2006
